Creative Applications in Thermal Capture & Harvesting

Don't waste heat, CATCH it!

The **CATCH** competition, part of the **Heat2Battery project** (EIC Pathfinder), is looking for **creative, unconventional, and impactful ideas** that use thermal energy in new ways — especially **low-quality heat** that's hard to recover or reuse.

Why join

- ✓ **Top Prize:** €1,000 for the most original and feasible idea
- ✓ **Acceleration Program:** tailored mentoring for 3 winners
- ✓ **Visibility:** present your concept to European experts and industry partners
- ✓ **Certificate of Participation:** for all entries scoring above 70/100

Who can participate

Students, PhD candidates, postdocs, professors, and academic teams across Europe who are passionate about clean energy, sustainability, and innovation.

Be Part of Europe's Energy Revolution

Got a clever idea?
